Los Angeles, CA | +1 (704)-681-4668 | jack.crim828@gmail.com | [linkedin.com/in/jack-criminger](https://www.linkedin.com/in/jack-criminger)

EDUCATION

University of California, Los Angeles (UCLA)

Bachelor of Science in Computer Science

Samueli School of Engineering

Expected June 2026

WORK EXPERIENCE

Software Engineering Intern

June 2025 - Aug 2025

Select AI, Inc.

Shibuya, Tokyo, Japan

- Built a full-stack GEO web application analyzing how AI models perceive and reference brands to improve AI visibility and allow companies to compare perception against competitors
- Developed FastAPI backend services for data ingestion, AI crawler analysis, sentiment analysis, and AI-generated summaries
- Implemented a React frontend to visualize competitor comparisons, keyword relevance, tone indicators, and analytics
- Collaborated in a cross-cultural engineering environment, communicating technical concepts across language and cultural barriers

Host & Server

July 2021 - Present

Cajun Queen Restaurant & Bar

Charlotte, NC

- Managed high-pressure workflows in a fast-paced, high-volume environment, maintaining speed, multitasking, and efficiency without sacrificing customer service quality
- Coordinated guest flow, seating, and front-of-house communication & presentability to ensure customer issues are resolved while keeping organizational operations running smoothly
- Delivered consistent, high-quality customer service, adaptability, and reliability while managing competing priorities and balancing work and academic responsibilities

PROJECTS

CrawlPal | *React, Node.js, FastAPI, REST API, GitHub, MySQL*

- Designed a full-stack GEO (Generative Engine Optimization) framework to evaluate how AI systems describe brands and competitors through search, keyword, or URL
- Implemented crawler summaries, keyword relevance scoring, and tone indicators to quantify AI perception across brands using FastAPI and AI APIs (Claude, GPTBot)
- Implemented structured data models using MySQL and REST APIs to support side-by-side competitor analysis and consistent AI outputs
- Built interactive visualizations using a responsive React UI with real-time updates on brand insights

PaperLeaf | *React, Node.js, HTML, CSS, GitHub*

- Implemented frontend logic to support image upload and dynamic rendering of converted LaTeX output
- Developed and refined React-based UI components as part of a 5-person team, translating design requirements into responsive, reusable frontend code
- Improved usability and visual clarity to streamline the workflow from handwritten input to formatted output

TECHNICAL SKILLS

Languages: C++, C, Python, JavaScript/TypeScript, HTML/CSS, SQL

Frameworks/Libraries: React, Node.js, FastAPI, NumPy, Anthropic (Claude AI)

Developer Tools: Git, GitHub, VS Code, XCode, Docker, Jupyter, Xilinx Vivado

Relevant Courses: Data Structures & Algorithms, Operating Systems, Software Construction, Software Engineering, Programming Languages, Databases, Discrete Math, Applied Probability & Statistics, Linear Algebra, Calculus

Interpersonal Skills: Communication, Customer Service, Multitasking, Team-Building, Self-Motivation, Time Management, Capacity Planning & Organization
